

This half term Coral's topic has been all about going to infinity and beyond.

We have been travelling to different planets, so far we have been to earth, the moon and mercury. We are looking forward to exploring more planets.

This term we are going swimming, already we are getting more confident in the pool and learning new skills in the water.

*We hope that you can join us in March when we invite you into Class to take part in with some of the exciting things we do!*

*Love Coral class*
