

Hello! :) We are getting near the end of the year and we'd like to tell you a little more about our adventures, learning and exploration over the last few months.

In Summer 1, we spent loads of time learning about all the cool jobs like the police, firefighters, vets and other people who help us! We loved dressing up as doctors and police officers and learning about what those people did, the equipment they used and the vehicles they drove.

When not in class, we'd put our scientist hats on and escape into the Science Garden. We focused on going beyond individual words to explain what we saw around us. We tried broadening our vocabulary and adding more and better describing words to show our growing understanding of the natural world.

# Cyan Class News

The second half of the Summer Term, started with an exciting Sports Day, which many of you attended. We then moved onto our new topic—Under the Sea—which was all about the fascinating sea life!

We all enjoyed lots of brilliant events including spending the afternoon with our brothers and sisters for siblings afternoon, making amazing artwork with students from the Britt School and going on our Summer trip to Oxygen.
