Fun apps to help children learn- free to download (may have in-app purchases)

Mr Potato head has a fun interactive app

Talking tom helps encourage sound/speech he will copy what sounds and words you say and repeat them back to you, he also has some fun interactive tasks for you to complete.

Can you draw your shadow?

Stick some paper to the wall and use a torch to make your shadow appear on the paper and ask someone to draw around your shadow- then decorate 😊 this is so much fun!

You will need: torch, paper, markers, a dark area

Try using your toys to make different shadows to trace or to act out your favourite story!
